

AN INITIATIVE OF GASP

Alabama Mayors for 100% Sustainable Energy Pledge

I, Mayor Randall Woodfin of Birmingham, AL support a goal of 100% sustainable energy in my city and pledge to work towards this goal during my tenure as Mayor.

As such, I affirm the following:

I believe sustainable energy is good for the City of Birmingham and the State of Alabama because it will create economic development opportunities and jobs.

I believe sustainable energy will help the City of Birmingham and the State of Alabama become a more just and equitable place to live, work, and learn.

I believe the overwhelming scientific consensus of anthropogenic climate change and that it is an urgent global challenge.

I believe that local, community-focused solutions are essential to reducing greenhouse gas emissions.

I believe that it is important for the City of Birmingham to transition away from dirty fossil fuels and toward energy efficiency, solar, wind, and pollution-free electric public transportation.
